## CAL AGAIN IN THE HEADLINES

Culver Calhoun is now digging his potatoes, and they are of an enormous size, many weighing two lbs. and a good sized tub full to the hill; no small ones either. He has also grown a variety of winter radishes that will average two lbs. each.

Nice going Cal, but you are still along way from the 4 lb. tomato grown by Dr. Whillans in dear old Ontario; and Don McCaskill's 100 lb pumpkins grown back east. Also many of the old-timers will remember Lou Fisher's fair sized pumpkins that he could not stretch around with his two arms. Lou claimed he loaded 300 of these into a wagon box and took them to the County Fair.

We could go on and relate a story of a large bull that our friend Don saw at the Toronto Exhibition, but this is another story and will throw it at some other time.

## THINGS TO REMEMBER

That 10 per cent discount is allowed on all Village taxes paid before December 1st.

The J. W. A. of the Anglican Church, are holding their tea and sale on Sat., Sept. 24th from 3 to 6 o'clock in the store next to Mr. Halliday's.

The regular monthly meeting of the Municipal District of Rosebud will be held in the Municipal office Crossfield on Saturday, Sept. 24. The monthly meeting the Legion will be held on Saturday evening of this week in the town hall at eight o'clock. We understand, arrangements will be made at this meeting for the holding of the annual Armistice dance.

Keep in mind the C. W. L. annual chicken supper and social evening on October 10. The occasion is to celebrate the twenty-fifth anniversary of the building of the church in Crossfield. A special program is being arranged and artists from Calgary and local talent will take part.

## GOT YOUR FIG WINE READY?

Fig wine has become very popular in town of late and many of our townspeople are giving it a trial. It is made of figs, oranges, raisins, sugar and a yeast cake to give it the kick. Boy, it's a great temperance beverage.

## BOARD OF TRADE NOTES

The Executive Committee is preparing a programme for monthly luncheons during the winter months.

The first luncheon will be held next month, date will be announced later.

A truck for the Grain Drive will be visiting farms in the district next week. It is hoped that all farmers will respond generously.

The Board of Trade is 100 per cent for Crossfield and district.

## HANGMAN SUICIDES

London, Sept. 20—John Ellis, the world's most famous hangman, ended eight years of brooding retirement Tuesday. He was found dead, his throat slashed and a razor by his side. On January 9, 1923, after 22 years at his sinister task, Ellis bore the reputation of being the hangman who had sent more condemned murderers to their deaths than any other living man.

## NEW C. P. R. TIME TABLE

Effective Sunday, September 25, trains will arrive at Crossfield as follows:

Northbound	
529, daily except Sunday	9.40 a.m.
525, daily	6.16 p.m.
521, daily	2.18 a.m.
Southbound	
524, daily except Sunday	1.24 p.m.
526, daily	7.32 p.m.
522, daily	5.22 a.m.

## WHEAT

Crossfield, Thursday, Sept. 22

No. 1 Northern.....32c

The red flag over the door of the Pool elevator office does not indicate that Happy is a Red, no, no, it's just a welcome sign to Chicago Cub supporters.

## SHOWER FOR MISS McFADYEN

On Saturday, September 17th, a number of the young people gathered at the home of Miss Eva Jarman where a shower for Miss Frances McFadyen was held.

During the evening the guest of honour was presented with an electric iron, later a dainty lunch was served.

The invited were: Mrs. D. McFadyen; the Misses Jean Arnott, Stella Gordon, Edith Seville, Mable Young, Helen Willis, Mildred Hyde, Desley Hyde, Peggy Cavander, Frances Mobbs, Alice Collicutt, Grace Williams, Margaret Murdoch, Marjorie Methall, Lillian Johnson, Kathleen Mair.

## POLICE COURT

George A. Pole, a farmer of the Airdrie, district, entering into a discussion on Sunday 11th with John Fletcher, a neighboring farmer, regarding the rights and wrongs of a farmer working on Sunday, returned home from the argument with two black eyes and a damaged nose, which resulted in John Fletcher appearing before A. W. Gordon, J. P. at Crossfield, on Saturday, 17th. Sept. He pleaded guilty to a charge of common assault, and was assessed \$5.00 and costs of the court. He paid.

## CROSSFIELD SCHOOL PREPARING FOR TRACK MEET

Every day sees a large number of the students of the Crossfield school going through their paces at the fair grounds, preparing for the track meet to be held in Carstairs on Wednesday, October 5th.

Those who will represent Crossfield are:

Margaret Fitzpatrick, Veva Green, Mary Murdoch, Verna Pogue, Isabel Goldie, Kathleen Fitzpatrick, Grace Riddell, Mildred Methall, Betty Bennie, Janet McCrimmon, Melva English, Irene Walker, Norma Miller, Cora Hall, Stanley Pogue, Ewen Wylie, George Nasadyk, Arthur Bennie, Frank Murdoch, Archie Bennie, Harold Mair, Jackie Williams.

## SCHOOL REGISTRATION SHOWS INCREASE OVER LAST YEAR

With the public and high school just getting into their stride for the fall term, the registration of pupils has been continuing steadily since the opening. The total registration is now 124 with four or five others still to come. The registration is:

Grade 1	20
" 2	11
" 3	7
" 4	18
" 5	9
" 6	6
" 7	7
" 8	8
" 9	11
" 10-11	27
	124

## WORLD'S SERIES SEPT. 28

The New York Yankees and the Chicago Cubs, will play the first game of the world's baseball series at New York on Wed., Sept. 28. The second game will also be played at New York on the 29th.

Everett Bills, Glen Williams, Bob Smart, George Lem and Lake Parsons, have a few bucks they would like to get up on the Yankee, but the Chicago supporters, including Alan Cruickshank, Happy McMillan, Frank Ruddy, Milt McCool, Bill Pogue, Shorty Jones, Donnie McFadyen, Speedy McLeod, Hugo Ballam, Fred Patchell, F. W. Gilroy and Harry Chatham, are all waiting for better odds before putting up their sugar.

## THRESHING DELAYED

Threshing came to a temporary halt around Crossfield, due to a heavy rain fall on Saturday night and Sunday. The odd machine started up again today (Thursday) but it will be Monday before threshing is general.

Very little threshing had been done previous to the storm, as only a few machines had started up.

## Notice

Owing to the continued depression  
we will allow

60c per bushel for  
No. 1 Wheat

## Coalition Governments.

The question of coalition, or union, governments has been brought very forcibly to the attention of the people throughout the Western provinces of Canada within recent months. There is undoubtedly a very considerable body of public opinion which favors the reorganization of governments at the present time upon a non-partisan basis—that is, the formation of cabinets of ministers inclusive of representatives of all existing political parties, with the strongest men chosen from each to constitute the Government.

But the average elector has but a hazy idea as to how this can be brought about. Many people entertain the view that all present parties are equally responsible if such coalitions are not effected. If an official offer of coalition is made by the head of the Government in office, and it is rejected by the other party, or parties, then, of course, the latter must accept full responsibility for their decision. There is, however, only one person in each Province who can take the initial step leading to coalition. That is the Prime Minister.

Under the British system of parliamentary government the King, or his representative, invites the leader of the party having a majority in the House of Commons, or Legislature, as the case may be, to form a Government. He becomes Prime Minister. It is then his sole prerogative to select his own ministers. He may consult as many people as he chooses, but he, and he alone, names his ministers. Nobody else has any rights in the matter, except, of course, that such ministers must be approved by the people themselves by election to the Legislature. Having chosen his ministers, the Prime Minister alone can demand their resignation from the Government.

It was Premier Ransay MacDonald who proposed the formation of a National Government in Great Britain; it was Premier Sir Robert Borden who proposed Union Government in Canada during the war in 1917; it was Premier Bracken who proposed coalition in Manitoba this year; it was Premier Tominé who recently proposed coalition in British Columbia. Nobody but the Prime Minister has any right to do so. For a leader of an opposition party to propose coalition would be to infringe on the prerogatives of the Prime Minister.

Once a Prime Minister does propose coalition to the leaders of other parties then a large measure of the responsibility for the realization of such a form of administration is shifted on to their shoulders, and it becomes a joint responsibility of all to so compromise their differences as to make a union of their forces effective.

Coalitions in the past, both in Canada and elsewhere throughout the Empire, have been brought about in times of emergency in order to carry through certain policies deemed by all in the interests of the country but which it would be extremely difficult, if not impossible, for a government representative of only a section of the people—even of a majority of them, to do by itself. Therefore, when coalitions are formed the exact nature of the emergency to be met, and the policies by which it is to be met, must necessarily be clearly stated, and it is on the basis thus set out that coalition takes place. This was true in the case of the present National Government in Great Britain, and also when Union Government was formed in Canada to win the war and enforce conscription.

Much of the opinion in favor of coalitions today is founded in the idea that party politics and party governments are a mistake; that the whole citizenship should be united in one party and one Government; in a word, that Provincial Governments at least should be in the nature of a municipal council, or board of directors of a company. Whether such an ideal is practical is another question. There are divergent groups in many company directorates, controlling majority and a dissenting minority. The same is true in municipal councils, although the members may not be definitely classified under party names or as Government and Opposition. But the parties or groups exist just the same.

In fact when any two persons join forces to bring about any given result a party is formed, and the same is true when two persons unite to oppose any given policy or line of action. In fact, coalitions become necessary when, because of a multiplicity of parties, no one party can command a majority and thus form a Government. Coalitions, therefore, are not the solution of the party system, and it would appear that they will continue to be parties just so long as everybody does not think, see and act alike on public questions.

Finally, a coalition government is not created through a joining of forces by a few individuals, but a union of parties. Only by a merger of parties for a given purpose can the required strength be given to a coalition. One or two individuals might enter a Government to add strength to that Government, but it would not be a coalition. Parties must unite to bring about a coalition.

## A Long Imprisonment

## Toad Released From Concrete Block After 22 Years

Cracking a large concrete block removed by blasting from the Welland south dock of the Welland Ship Canal, workmen were astonished to see a toad hop out from the centre of the block after it had been split. The dock was built in 1910, therefore the toad had been imprisoned for 22 years. It appeared slightly dazed for a few minutes after gaining its freedom, but was soon hopping about like any other toad. It seemed quite normal with the exception of its feet, which appeared to be under-developed.

Ice creams and soft drinks are becoming popular in China.

Eight pairs of twins are attending an Edmonton, England, school.

## Auto Has No Seats

## Wife Of Indian King Rides Sitting On The Floor

After his visit to Europe the Emir Feisal advised his father, Ibn Saud, King of the Hedjaz, to buy automobiles for the entire royal family. The result was a \$150,000 order. The coachwork of the cars is polished aluminum. The one for the Emir's mother is completely closed in and has no seats. Instead its floor is spread with thick carpets. Overhead are electric fans to cool the heat of the Arabian desert.

Four things come not back: the spoken word, the sped arrow, the past life, the neglected opportunity.

To promote trade in "Swadeshi" products, Calcutta, India, will open a commercial museum.

## Suffered A Severe Attack Of Dysentery

Mr. P. L. D. Moulard, Vernon, B.C., writes:—"Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Extract of Wild Strawberry, which I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest."

"Wild Strawberry is sure relief for dysentery, colic and diarrhoea, but I always see I get the genuine 'Dr. Fowler's'."

## One Well-Managed City

## Louisville, Kentucky, Took Simple Way of Effecting Economy

Louisville, Kentucky, will face its new fiscal year, September 1, with a cash surplus of more than \$400,000, the majority of its employees will be on a full salary basis and another reduction in taxes is promised.

Cheques are being written for \$140,000 to pay back a 10 per cent. salary cut which went into effect on January 1. At the same time the tax rate has dropped from 23.4 mills to 22.3 and assessment values have been cut 7 per cent.

The explanation is simple. In the closing days of 1931 Mayor Harrison, of Louisville, announced a 10 per cent. salary cut for civic employees, and at the same time promised them that should they effect sufficient economies despite the reduction in the tax rate and assessment, they would be given the back pay.

The effect was instantaneous. Economies were effected in every department. The savings came from positive acts of the employees, such as curtailing gasoline supply, care in driving trucks and other vehicles, substituting of materials—in short, from thrifty vigilance.

Even the taxpayers showed an improved tone. On July 28, 89 per cent. of the taxes had been paid, leaving only \$387,046 unpaid of the total \$8,055,945 receivable as of January 1, 1932.—Winnipeg Tribune.

## HAS LOST FAT FOR THREE YEARS

## 68 lbs. Gone Altogether

A woman writes—"For nearly three years I have been taking Kruschen Salts every morning in hot water, and have lost 68 lbs. of fat. My weight before taking them was 196 lbs., and it is now 128 lbs. Compare the difference—it is marvellous. My mother and sister are also taking Kruschen and lots of our friends, and think they are wonderful. As regards diet, it is not necessary to do a little bit of dieting; in my case I have never denied myself anything since I started taking Kruschen Salts. I walk every day, and do not eat many potatoes or much sugar. I don't think I shall ever be grateful enough to Kruschen Salts for the great help they have been to me, and shall never stop taking them, or recommending them to people I think need them."—Miss K. T.

I taken every morning Kruschen effects a perfectly natural clearance of undigested food substances and all excessive weight waste away. Unless this wastage is regularly expelled, Nature will eventually sort it up out of the way in the form of ugly fat.

## Boys Won In Contest

## Ontario Youths Beat Girls In Cooking and Sewing

Success crowned the efforts of two Ontario boys, when they invaded what has been regarded hitherto as women's precinct, at Woolwich township school fair.

Ralph Howlett and Gustav Brohman were the youths. Leading all contestants, girls included, Howlett won the sponge cake competition, and Brohman stitched the two best buttonholes and button.

Fersian Balm is aluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Irresistible to all women who care for elegance and distinction.

## Better Than A Fee

Because they refused to accept pay for their services at a cabaret entertainment given in connection with the celebration of Lord and Lady Londale's golden wedding celebration, a number of London cabaret girls have just received diamond brooches from Lord Londale. The men performers were given diamond stick pins.

Worms in children, if they be not attended to, cause convulsions and often death. Mother Green's Worm Expeller will protect the children from these distressing afflictions.

## Two Historic Documents

The death warrants of Charles I. and Mary Queen of Scots, are among the bequests in the will, published recently, of Miss Margaret Penelope Clegg, of Boston, Lancashire. She left the two death warrants and other historical relics to the Guildhall Museum, London, England.

A "cheerful telegram" campaign to boost the sending of good as well as bad news by wire, has been started in Scotland.

Rome today has fewer citizens than it had 2,000 years ago.

## Quick RELIEF from pain

A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain.

Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systemic pain; to men who must work on, in spite of eye-strain, fatigue or neuralgia.

Learn its quick relief for colds; for neuritis, rheumatism, lumbago. Be sure to get Aspirin—and not a substitute. All druggists sell Aspirin tablets. "Aspirin" is a trade-mark registered in Canada.

## Rise in Copper Prices

## Trend Of Prices Will Give Encouragement To Mining Industry

Mining interests in Canada are watching closely the upswing of world prices in copper, and the view was expressed at Ottawa that a continuation of this upward trend would have a corresponding reaction in the industry which has been languishing in Canada for the past two years. Copper prices have risen to 6.35 cents a pound, while a few weeks ago they were as low as five cents.

"There is a big difference between that figure and the peak price of 18 cents," declared a prominent government official associated with the mines department, "but undoubtedly this increase, if it is maintained, will encourage the copper industry."

In eastern and central Canada the three large producers, Noranda, International Nickel and Flin Flon, were continuing operations; but Sheritt-Gordon had not been working for some time. With higher prices, however, prospects were that all the producers would come into play. In British Columbia, the Britannia and Granby mines were still in production.

Awful Asthma Attacks. Is there a member of your family who is a power of this distressing trouble? No service you can render him will equal bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

## Wonders Have Vanished

Loch Lomond, Scotland, where Kaye Don made his world speed-record, has lost wonders which attracted tourists. Its floating island has disappeared, and scientists have explained that its "waves without wind" are merely the result of natural swell, and that the "ghost boat" must be real vessels which travel from one island to another by swimming.

## Should Make For Contentment

The entire State of Montana, it is estimated, will have a wheat crop of 58,000,000 bushels. The Lethbridge district of Alberta, some farmers predict, will have 40,000,000 bushels. Comparisons in this instance should make us feel contented with our prospects says the Lethbridge Herald.

A new style baby carriage hood is of glass that lets ultra violet rays through and keeps out the infra-red rays of light.

Unemployment in Germany continues to decrease.

## She Shouldn't be Tired

No energy...circles under my eyes. I have would only try Lydia E. Pinkham's Vegetable Compound in tablet-form, she could be strong and happy again.

W. N. U. 1900

## Lost In Storm

## Harrowing Experience Of Missionary In The Far North

Without food or shelter, lost in an Arctic blizzard for five days, was the harrowing experience of Rev. J. H. Webster, Anglican missionary at Coppermine, on the Arctic Ocean, as related by him in Winnipeg recently.

Webster, who had been in the Arctic lead dog was the cause of his trouble. Last January the missionary was travelling east of Coppermine, visiting Eskimo villages, in 30-below-zero weather, a blizzard blew up, and the lead dog tore his harness and disappeared into the storm.

"Before I realized it," Rev. Mr. Webster said, "I had incautiously left the six remaining trustworthy dogs and ran along the truant's trail, giving no thought to the danger to which I was exposing myself in leaving food, stove, fuel and dogs behind."

The tracks of the runaway dog were soon obliterated, and the missionary turned to retrace his steps only to discover that he was lost. He wandered until midnight, and then lay down in his parka to sleep. The storm continued unabated the following day, and he moved on. The second and third nights he slept in the snow, and he realized he was growing weaker. On the fourth morning he dug himself out of the snow to find the storm was over and the skies clear.

He did not feel hungry, but his legs would scarcely bear his weight, and he finally dropped on the ice. He was awakened by a native who had been sent out to search for him, and taken back to the mission.

The Oil For The Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the farmer who suffers from pains and aches, but there are directions for its use on almost all the ailments of the farm. A bottle of it in the house.

rub on VICKS VapoRub

BEST FOR ADULTS, TOO

Chemists Make Discovery

Find Nitrogen Fertilizers Are Good For Grazing Lands

London chemists make a startling discovery. It is now possible to grass seven cows where four grazed before. Thus England, with a large control might almost double its beef herd, increase home-grown foods from 38 to 65 per cent, add 10,000,000 sheep in 10 years Britain might even become self-supporting in meat, butter, cheese and eggs. The open season to this agricultural wonder world is—nitrogen fertilizers. As Dean Swift might have said: "Whoever makes two blades of grass to grow where but one grew before deserves well of mankind—though his fairy dust be fertilizer.—Christian Science Monitor.

Painless and perfect in their action Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Red snow is found in many places among them the Forbidden Plateau on Vancouver Island, British Columbia. It is due to the presence of innumerable microscopic plants.

No more dusting for me!

at least not with old-fashioned dust cloths. I've found a better way.

Thousands of Canadian women know that her "better way" is Applender Wonder Paper. Made in Canada, it is a soft paper pulp scientifically treated with high-grade furniture polish, it dusts—as it cleans—like a polish.

Wonder Paper is changing the old-established order of housecleaning. One neat package of it appears more to women than yards of old rags that spread dust and constantly need washing to be sanitary.

You get twenty-five sheets of Wonder Paper for a quarter. Simply crumple a sheet into a soft wad, go over the furniture, woodwork, and the floor. The results are a delight. In half the time and with half the effort, you get a necessary task done far more satisfactorily. And when you're through, throw away the piece of Wonder Paper. No shaking out, or washing of dusties. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous PIAA, the Heavy Waxed Paper in the Green Box. Most grocery, hardware and department stores carry it. Write for Wonder Paper in stock. If yours hasn't, just send this coupon and we'll give you five rubs of free paper, containing one hundred recipes, as a bonus.

Applender Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 10c for which please send me one package of The Wonder Paper and your 100 recipes for "Lovers."

## Homes And Jobs Needed

Position Of Young Men On Road Not Happy One

Comments from railway travellers about the large number of boys seen riding on freight trains have been substantiated by conservative authorities who estimate that between 200,000 to 300,000 youth from twelve to twenty years of age are now "on the road." Another "roving army" of jobless youths is reported in Great Britain. Russia has been troubled by bands of children wandering about the country stealing what they could find.

The wanderers here represent a new type. They are neither lazy nor adventurous. They are not criminaly inclined. In fact some of them are fairly well educated. Broken homes reduced family incomes and unwillingness to remain a burden to an already large family are responsible for their wanderings. Their lot is not a happy one. Last winter a western city reported taking from freight trains thirty-five men and boys who were seriously ill. One railroad has reported fifty young men and boys killed and a hundred others injured during a single winter as the result of hopping trains. The best the wanderer can hope for in a town is two meals of bread, coffee and beans and the admonition to "move on."

Although a publicity campaign is planned to give warning of the dangers of "taking to the road" it can hardly be expected to prove a complete remedy. Both homes and jobs are needed to keep these young men off the road.—New York Evening Post.

## Toll-Bridge Keeper

Collects Rare Coins

Has One Half Dollar Which Is Centuries Old

Collectors of old and rare coins are advised to take jobs as collectors on toll bridges, if they can get them, in order to augment their collections.

The experiences of employees of the toll bridge at Sunbury, Pennsylvania, justify the advice.

E. A. Wheeland, one of the collectors here, reported his latest find was a half-dollar coined in 1831. The coin was larger than the present 50-cent piece and caused Wheeland to hold up the motorist who gave it to him until the money could be examined. On one side was a head of "Miss Liberty" and on the other a spread eagle. On the edge were inscribed the letters "Fifty Cents." Convinced of its authenticity, Wheeland gave the motorist 40 cents in change.

Other curious coins recently taken in by Wheeland included an English piece of silver, a Cuban coin and other foreign money.

## Act As Rest Cure

Dull Days Make People Respond To Stimulant Of Sunlight

Sir Henry Gauvain of England, discussing the effects of sunlight on health, said: "Our dull winters are all to the good. They act as a rest cure which is very beneficial. When the sunlight comes back we are in a position to respond to that stimulant. "When the Daylight Saving Bill was introduced, critics were concerned about the health of children. Staying up late at night they said could only do harm. The effects are entirely different. I have never heard of any authentic cases in which the extra hour has caused harm to the health of a child. Though there is much more mental activity the child is able to respond without fatigue. In Norway in summer, the children play in the streets in the middle of the night, go to sleep just when they feel like it, and they seem none the worse for that. In the dark winter with no sun they almost hibernate and are dull and dispirited."

"Dad, lend me your pocket knife."  
"What for, son?"  
"To carve my name on the dining room table." — Bonadventure-Strix, Stockholm.

PEACOCK IN FULL DRESS PARADE IN BEACON HILL PARK, VICTORIA, BRITISH COLUMBIA

## Four Royal Golfers

Sons Of King George Are Enthusiastic

The Prince of Wales' enthusiasm for golf has secured another royal convert, the Duke of Gloucester. The Prince was the first to catch the golfing fever, and he was very quickly followed by the Duke of York, who when he is in practice makes a very level match of it. Not long ago Prince George took to the game and had lessons from Archie Compston. He shows the same keen desire for practice as the Prince of Wales. And now the Duke of Gloucester has been playing golf while at Cowes with members of the Royal Yacht Squadron, and is planning to join a club in Berkshire. That means that all four brothers are now golfers, and I imagine that before long there will be some pretty tense battles between them, for they are keen rivals in sport. Prince George, doubtless will keep up his tennis and his love for playing the piano. Few people realize what a talented pianist he is, both of modern and classical music. He has the useful gift of being able to play over a tune he has only heard once.

## Walking Comes Back

Many City People Renewing Interest In Healthful Exercise

Walking seems to be regaining its dignity. New York people who used to drop in to the subway to go six or eight blocks are now walking and saving their nickel.

Walking for pleasure is also on the rise. There is not so much evidence of hordes of week-end hikers ostentatiously dressed for making mileage. But great numbers with unaccustomed leisure on their hands find walking is pleasant and healthful. They are eager to learn of quiet roads, free from dangerous traffic, shady and rustic-seeming.

In 1915 the Newark public library listed "Walks Near Newark," some twenty short trips. The list was revised from time to time, until the ubiquity of the motor car made many lose the taste or the opportunity for walks. Renewed interest now prompts the library to ask for fresh suggestions about enjoyable trips from individuals or walking clubs.

## Enforcing the Migratory Birds Act

Officers of the Royal Canadian Mounted Police, acting for the National Parks Branch, Department of the Interior, which administers the Migratory Birds Convention Act in Canada, seized at Ottawa recently three live bobolinks (gogius) which were being kept in captivity as cage birds. The birds were taken to Rockcliffe Game Preserve and released in congenial surroundings. Practically all wild birds are protected by Dominion and Provincial law and may not be kept in captivity. Persons violating these laws are liable to heavy penalties.

## Detects the Bumps

A railroad company in England runs what is called the "whitewash special." The train carries no passengers, but it is equipped to note every jolt and bump on the tracks. As a bump is hit, a splash of whitewash is dropped on the ground to mark the spot for repair crews.

Guest (at country inn): "Charming place this is—seen the old wing?"  
Second Guest: "Oh, yes, had it for lunch."

Don't judge a man by his size. The biggest fiddle in the orchestra plays the finest notes.

New Zealand's butter output has increased 7 per cent. in the last year.

## Men Most Careless

In Crossing Street

Women Show More Sense Opinion Of Winnipeg Traffic Officer

"Men are dumber than women when it comes to crossing the street without ending up on a stretcher," says a Winnipeg policeman. He spoke as if he knew what he was talking about. More than 20 years of watching traffic and traffic-dodgers had given him plenty of experience. "Men," he continued, "will walk in the path of an oncoming auto and time themselves so that it will barely miss them. They like to take chances and show off, especially the younger fellows. And you'll see them duck into a stream of moving autos and dodge their way across the street just to save a few seconds. Women show more sense."

With men it's most often a case of not looking where they're going. They have their minds on a business problem, or a golf game or on nothing in particular, and the next thing they know they're doing a loop. "It's hard to believe," said one civic official, "but I know of cases where a man has walked slap into the side of a street car, apparently without even knowing it was there until he hit it—and I've yet to see the man who can tackle a street car with any success."

With women, accidents usually result from their getting excited. They see, for instance, an approaching street car which they want to catch and they get so excited about getting to the tracks in time to flag it that they run into the path of an auto.

## New Evolution Of Science

Frozen Cider Will Keep Sweet For Several Months

Modern Science is always coming to the fore with some new wrinkle which extends the market for farm products. One of the latest evolutions is frozen sweet cider. When it comes from the press cider is frozen to zero degrees F. and held at that temperature until thawed for sale or use. When thawed out it is perfectly fresh and sweet. It will keep seven months or more held at zero, and there is every prospect that it may be developed into an important beverage outlet or by-product for orchardists.

Germany has 4,708 daily newspapers.

Industrial activity in Shanghai, China, is increasing.

## FANCIFUL FABLES

## Live Stock Feed

Investigation Work Under Way To Determine Relative Value Of Different Products

The ruinous prices of grain during the last couple of years has aroused special interest in the relative value of different kinds of live stock feed. Early in 1933, wheat pool officials appealed to the Grain Research Committee, stating that in the preparation of a circular for their members they had found great difficulty in finding authoritative published information, and asking whether something could not be done to summarize the results of feeding experiments, particularly in regard to barley, a home-grown product, and corn, a product largely imported.

The Committee found on inquiry that Professor E. W. Crampton, of Macdonald College, had already started some work along this line. They made a grant to assist him in extending the scope of his investigation to cover all the modern published literature available on the comparative value of wheat, oats, barley, rye and corn for feeding horses, cattle, sheep and swine. Poultry feeding, it may be remarked in passing, is now the subject of a special investigation by Professor Berner, of the University of Manitoba, assisted by the National Research Council. Professor Crampton's report should be ready for publication before the end of the current year. It will not only give extremely useful information on the value of the various grains for feed, as shown by a statistical study of the results of over seventeen hundred experiments, but it will also indicate some of the lines along which future animal feeding experiments might profitably be directed.

## Fifteen Miles Per Hour

Speed At Which Harnsworth Trophy Was Once Won

The Harnsworth Trophy and speed on water have become synonymous in recent years. But it was not always so.

With Gar Wood's "Miss America X" and Kaye Don's "Miss England III"—each capable of speeds above 120 miles an hour—it is almost inconceivable to imagine that the trophy once changed hands with a speed of 15.45 miles an hour. Yet, it is true.

Back in 1906, three years after the late Lord Northcliffe (then Sir Alfred Harnsworth) placed the trophy in competition, Lord Montague of Beaulieu and L. de Rothschild, of England, built a challenger, "Yarrow-Napier," and went across the English Channel to France in an attempt to regain the trophy.

It was in this same race that America made its first bid for the trophy. W. Gould Boloway, of New York, went aboard with a boat he chose to call the "Challenger." On the trip across the Atlantic, "Challenger" lost her protecting hood. The boat was raced with engines uncovered and finished with only three of her cylinders hitting. At that she was beaten by only two minutes and the winner was "Yarrow-Napier" that completed the course at the amazing speed of 15 miles an hour.

That's a far cry from the present speeds, but it happened only 26 years ago.

Winning the Harnsworth at 15 miles an hour—it sounds like fiction when you look at the monsters Wood and Don raced in this year's events.

## Telephone Manners

Being Courteous Over 'Phone Great Asset In Business

'Phone manners might well be made a compulsory study in the schools, business schools, at least. Everyone knows how nice it is to hear a pleasant voice over the telephone, and the reverse, short, crisp, sarcastic or even impudent voices, irate complainers on the 'phone are often soothed and frowns changed to smiles by a patient, good-natured voice in reply, and many a good business connection has been saved in the same way, while, contrarily, much good business has been sacrificed because of irate aroused by telephone too-smartness. If one end of the wire is hot keep the other cool. When a person picks up the telephone to give someone a piece of their mind, if the other person keeps cool and pours smooth words into the troubled transmitter the person at the other end generally finishes by being heartily ashamed of the burst of temper. Good nature on the telephone is worth much money in the business world and much comfort in the social world.

A London department store has been installed for public inspection a seismograph, an earthquake recording instrument.

## The Anglo-Irish Dispute

Britain Has Counted Cost and Empire Comes First

We must recognize that Britain and the Free State, under her present Government, have come definitely to the parting of the ways. The situation, in a sense, is strange, because, though it is almost desperately grave, there is here not the slightest excuse for passion or heroics. The Free State can become a republic tomorrow without the loss of a single drop of blood. She is as free to walk out of the British Commonwealth of Nations as a man is free to walk out of church. Britain offers no threats, and has not the least desire to be vindictive. On the contrary, all her transactions with Mr. de Valera's Government have been done in good-will. It is manifest, however, that Britain has counted the cost, and has decided that, as between Free State and Empire, she must choose Empire. She cannot afford to have an alien and distrustful element in the British Commonwealth of Nations.—Weekly Irish Times, Dublin.

## Pear Sells Historic Abbey

Was Founded Thousand Years Ago By King Athelstan

"It has 67 bedrooms, and who in the world wants 67 bedrooms, I cannot possibly sleep in 67 bedrooms!"

Thus Sir Eric Hambro, famous banker, explains why he sold rambling old Milton Abbey, historic Dorset seat of the Hambros—but to Sir Eric just an irritating "white elephant and a nuisance."

The name of the buyer of the venerable Abbey is not, for the present, made public.

Milton Abbey was founded a thousand years ago by King Athelstan, and remodelled in the 14th century by the Benedictine friars.

Except for the monks' hall and the refectory—"a stately apartment with a roof of Irish oak"—all the monastic buildings were pulled down in 1771.

The present house, with its 67 too many bedrooms, was built at that time by the Earl of Dorchester. This same Earl, in that same year of 1771, didn't like having the ancient town of Milton so close to his home, so he demolished the whole town, and built the model village of Milton Abbas at a more respectful distance!

The Hambro family came into possession of the Abbey, with its thick, cold walls, 67 bedrooms, and family ghosts, and without planning or heating, about the middle of the last century.

## Grains Alone Not Enough

Balanced Ration Is Necessary For Finishing Bacon Hogs

In order fully to realize the opportunity which is in his marketing bacon hogs the farmer of the prairie provinces, in particular, must realize as a fundamental fact that grains alone are not enough to make good hogs. Where milk in some form is available it supplies the ideal protein supplement, or balance, to the ration, but in many parts of Western Canada, in particular, milk in any form is scarce. In such cases tankage should be included in the meal mixture. It is an ideal supplement and adds zest to the feed even when milk is available in abundance. To make your home-grown feeds count you must feed a balanced ration, and tankage is a good means to this end.

## A Doubtful Compliment

Guest—I wonder if you would mind giving me the recipe for that plum cake you served this afternoon at tea?

Hostess—Why, I'll be delighted to give it to you. But your wife makes the most beautiful plum cake!

Guest—I know, but in this time of depression I want her to be more economical.

"Can I have tomorrow off, ma'am?"  
"Yes, why do you ask?"  
"I was thinking of getting married, but if it does not suit you, I can have another day."—Buen Humor, Madrid.

## Sweeter, More Fragrant in Your Pipe!

Any pipe tastes better, from the time you first load the bowl with Ogden's cut plug — it's sweeter, richer, cooler and more fragrant.

If you "roll your own", use  
Ogden's fine cut  
cigarette tobacco.

# OGDEN'S CUT PLUG

### WORLD HAPPENINGS BRIEFLY TOLD

A suitable home for the Canadian legation in Tokyo may be expected in the very near future.

Jimmy Oates, first man to cross Canada by motorcycle, now plans to motorcycle from Ottawa to Churchill, Switzerland sent 2,200,000 pounds of silk and rayon products to Great Britain last year.

Thirty more Dunkirk men have been sent to Piers Island. There are now about 100 men on the island.

Three Chinese boys have left Calgary for their homeland to join the Nationalist army air force. They were trained locally.

The report to the League of Nations on Manchuria advises establishment of Chinese autonomy under Japanese advisers.

The British Government has received no intimation from the United States regarding postponement of the world economic conference, expected to begin in London in October.

Lord Wakefield, owner of "Glen England III," fastest speed boat in the world, announced he would take no further part in motor boat speed contests.

Population contained within the area designated as Greater Vancouver, according to the census of 1931, is placed at 508,340. It is reported by the Dominion Bureau of Statistics.

### Honey Producers May Expect Good Prices

Flood Over Whole Dominion Lighter This Year

Reports made by C. B. Gooderham, Dominion apiarist, state there is about a 60 per cent. crop in Ontario, a little over 60 per cent. in Saskatchewan and 60 per cent. in Alberta.

While the honey crop in the Red River Valley is somewhat lighter on account of dry weather injuring the clover crop reports from central and northern Manitoba indicate a better crop than last year.

The favorable weather in the spring and early summer developed the clover crop about 10 days earlier than usual in Manitoba, with beneficial results to the honey harvest. According to Mr. L. T. Floyd, provincial apiarist for Manitoba, producers may expect good prices in view of the fact that the yield over the Dominion is only about 50 per cent. normal.

**Gift For King George**  
Two vases bearing the royal arms of Portugal, which were in the late King Manuel's English residence, Fulwell Park, Twickenham, Middlesex, are bequeathed under his will to King George as a testimony of "deep gratitude for his many kindnesses."

### Highland Society Bars Women From Membership

Not Even Royal Lady Can Preside At Annual Festival

The Highland Society of London have decided to ask the Prince of Wales to preside at their next annual festival in June of next year. The decision to make arrangements so far ahead is due to the fact that the patronage of any member of the Royal Family can only be assured by making direct representations many months in advance. The Society is more or less precluded from inviting a Royal lady to preside at their annual festival as the Act of Parliaments of 1810 and 1831, by which they have been incorporated, forbids women from membership.

(By Ruth Rogers)

### THE GUMPE DRESS HOLDS MUCH JOY FOR TINY SCHOOL GIRLS TO START FALL

Isn't this one fetching?  
It's very gay too!  
The dress is brown linen. Red and white plaided linen is used for the separate gumpes. Note how it buttons down the back. It can also be worn with a brown and white dotted batiste gumpes.

It's very simple to fashion it. And it requires the minimum of material.

Style No. 853 is designed for sizes 4, 6, 8 and 10 years.

Size 8 requires 1 1/2 yards 35-inch with 1 1/2 yards 35-inch for blouse.

For later fall wear, a cunning idea that is exceedingly smart is a tweed mixture in wine-red tone with plain touting wool crepe gumpes.

Rayon mixtures and novelty wools are attractive with plain touting gumpes.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Plan World Cruise

Cunard Cruiser "Carinthia" To Make Cruise Of Southern Hemisphere

The Southern Hemisphere will be encircled for the first time by a cruise liner when the Cunard cruiser "Carinthia" makes her world cruise next January, leaving New York on January 7th. The entire cruise will be made under the Southern Cross. The duration of the cruise will be 130 days with a distance of approximately 86,301 miles, calling at 35 ports.

After leaving New York the "Carinthia" will call at Kingston, Jamaica, then through the Panama Canal to California, Hawaii, down to the South Sea Islands, visiting in rapid succession those atolls of fabulous beauty and fascination, Tahiti, Rarotonga, Samoa and the Fijis, continuing to New Zealand and Australia, New Guinea, the Dutch East Indies, including Bali and Java, the Strait Settlements, Ceylon, makes a stop for the first time in the history of any cruise at the famous Seychelles Islands, (Port Victoria), down the coast of sunny East Africa from Mombasa to Cape Town, across the South Atlantic to Montevideo (for Buenos Aires), Santos, Rio de Janeiro, and back to New York. Practically all ports of the itinerary have seldom been visited by Canadians or Americans.

The cruise will be particularly interesting to Canadians in that a large number of British possessions will be visited, including America, New Zealand, Australia, the Strait Settlements, Ceylon, Seychelles, Kenya, Zanzibar, Union of South Africa and Barbados.

The ship is due back in New York on the afternoon of Thursday, May 29th. The "Carinthia" is the newest steamer in the Cunard fleet, was especially constructed for cruising and is of 20,000 tons gross. The shore arrangements of the cruise are being managed by Thos. Cook & Son.

### Ray Penetrates Fog

Apparatus for projecting an invisible ray that penetrates fog has been installed on two new German liners. The beam is said to increase by twenty times the distance through which the human eye can see and is as efficient by night as it is by day.

### New Anti-Aircraft Gun

Claimed To Have Range Of Seven and Half Miles

That a new anti-aircraft gun can bring down an attacking bomber seven and one-half miles up in the air, is the claim to those conducting tests on the Riviera coast near La Seyne, France. The secret of the gun's construction is jealously guarded by the firm whose engineers planned it. Anti-aircraft guns have previously proved effective at a height of about three and one-half miles, but modern aircraft can attain much greater altitudes. In the experiments off La Seyne an aeroplane with pilot and mechanic, ascended seven and one-half miles towing, suspended 1,000 feet beneath it, a target on which the anti-aircraft gun opened fire with live shells. Aviation, military and naval men of Europe are watching the tests.

### Recipes For This Week

(By Betty Barclay)

#### CRISP MOLASSES COOKIES

- 2 1/2 cups special cake flour, sifted.
- 1 teaspoon baking powder.
- 1 teaspoon salt.
- 2 teaspoons ginger.
- 1 cup molasses.
- 1/2 cup butter or other shortening.
- 2 teaspoons soda.

Sift flour once, measure, add baking powder, salt, and ginger, and mix again. Heat molasses, remove from fire; add shortening and soda. Add flour gradually. Chill. Roll very thin on slightly floured board. Cut with floured cookie cutter. Bake in moderate oven (350 degrees Fahrenheit) 10 minutes. Makes 8 1/2 dozen cookies.

#### STUFFED PRUNE SALAD

- 2 packages cream cheese.
- 1/2 can coconut, Southern style, chopped.
- 2 tablespoons mayonnaise.
- 24 cooked prunes, seeded.

Blend cheese, coconut, and mayonnaise. Stuff prunes with mixture. Serve on crisp lettuce. Garnish with additional mayonnaise. Serves 8.

#### SPECIAL MACARONI SALAD

- 2 cups cold cooked macaroni.
- 3/4 green pepper, chopped.
- 2 raw carrots, thinly sliced.
- 1 medium sized onion, chopped.
- 1/2 cup French dressing.
- Eggless mayonnaise.

Combine macaroni, vegetables and French dressing. Add sufficient Eggless Mayonnaise to bind ingredients. Chill before serving. Serves six.

#### Old Orders Still Used

Some of the standing orders still in force in the House of Commons are over two centuries old. An old Norman French phrase is still in use in certain instances, namely "Le Roy veult" (the King wishes it) in giving the Royal assent to a Bill.

Grapefruit trees normally do not flower until they are at least five years old; but after X-ray treatment grapefruit seedlings a month old produced small flowers.

—THAT all the "Battles of the Century" are not fought in the "squared circle" Here is a view between two peaks in the shadow of Pyramid Mountain in Jasper National Park, Alberta, Canada, before an uninterested audience.

### SUNDAY SCHOOL LESSON

SEPTEMBER 25

#### MOSES HONORED IN HIS DEATH

Golden Text: "Precious in the sight of Jehovah is the death of His saints."—Psalm 116: 15.  
Lesson: Deuteronomy 32:48-52; 34: 5-8.  
Devotional Reading: Psalm 116:12-19.

#### Explanations and Comments

Moses Learns Of His Approaching Death, 32:48-52.—Moses' work was over. In the plains of Moab he was in sight of the goal of his forty years' pilgrimage. He could behold the Land of Promise, for he was over against Jericho, but he was not to enter it; his last hour had come.

Death is part of the divine economy. The thought of death should make this life seem worth while, and the other world real. Life is a beautiful gift from our Father's hands, meant for us to enjoy, but above all, to use aright. And death is another gift from our Father which will lead us into an infinitely larger, happier life. Dr. Henry van Dyke's beautiful prayer, "The true spirit: 'Steady me to do my full stint of work as well as I can; and when that is done, stop me, pay me what wages Thou wilt, and help me to say, from a quiet heart, a grateful Amen.'"

The Death Of Moses, 34:5-8.—To Joshua, his minister, Moses turned over the reins of his authority. "He climbed to the summit of the ridge overlooking the Plain of Moab. Below him lay the white tents of the people whom he loved, for whom he had labored. To the West lay the goal which he had ever had in view; its attainment had been the sustaining hope throughout all the wilderness life. Long and earnestly he gazed. And then he quietly turned away to the quietude of his journey to a fairer land than that upon which his eyes had been fixed. No finer close to a great life could be imagined. Any description of the pageantry of a royal funeral would be tawdry in comparison with the dignity and grandeur of these closing scenes. To leave the grand old warrior alone to look the land which in after years would witness in every event of its glorious spiritual history witness to his service—the imagination could not dream of an end more august and splendid."

"And had he not high honor?"  
The hillside for his pall;  
To lie in state, while angels wait  
With stars for tapers tall."

So Moses, the servant of Jehovah, died there in the land of Moab, according to the word of Jehovah. But no man knoweth of his sepulcher until this day; this statement was written long after Moses' death. "Out of the simple fact that the place of his burial was unknown to later generations, the Hebrew imagination drew the impressive conclusion that he had enjoyed the supreme honor of being buried by Jehovah other than Jehovah himself. It is a sublime interpretation, truly, but an interpretation. The religious interpretation and the history lie side by side in the words, 'Jehovah buried him alive in the valley, but no man knoweth of the sepulcher until this day.'—J. E. McAdams.

"The manner of Moses' death becomes the type of the fundamental isolation of the human soul, an isolation that may not be recognized for a time by those who are unwilling to face the facts of life, but which is nevertheless a fact that in the hour of death can no longer be ignored. Moses was no more alone when he died than he was when he lived. Infinite swept in upon his loneliness out of the gathering night than each one of us will be when the last farewell is over. This is a solemnizing thought in its implication of personal accountability, but it should not be a terrifying thought. It should dignify, not cow the soul; for the touch of the Infinite that seems so fatal to all fellowship and makes us realize our isolation must actually, in after all, only the cares of God, if we would but believe it that welcomes into true union and communion."—Professor Kemper.

"It matters little where he may grave,  
Or on the land or on the sea,  
By purring brook or 'neath stormy waves,  
It matters little or naught to me.

"But whether the angel of death comes down  
And marks my brow with a loving touch  
As one that shall wear the victor's crown,  
It matters much."

### Ontario Is Interested

#### Province Expects To Be Well Represented At World's Grain Show

Ontario will be adequately represented at the World's Grain Show in Regina, July 24 to August 5, 1933, Hon. T. A. Kennedy, provincial minister of agriculture, said at a meeting of the show's Ontario committee at Toronto recently.

The minister advised the committee Ontario should be represented in the intercollegiate and junior grain judging competition. Plans are being completed for holding grain judging competitions at several strategic points throughout the province to select representatives for a final competition at Guelph. There three Ontario representatives will be chosen. Consideration was given the preparation of an educational exhibit at the show, representing the natural resources of the province.

### Madame Lacroix's delicious CHOCOLATE LAYER CAKE

- 1/2 cup butter
- 2 eggs
- 1 teaspoon vanilla extract
- 1 cup milk
- 2 1/4 cups pastry flour (or 2 cups and 3 tablespoons of bread flour)
- 3 teaspoons Magic Baking Powder
- 4 teaspoon salt

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and favoring; add flour, sifted with salt and baking powder, alternately with milk. Fold in stiffly beaten egg whites. Bake in 1 greased layer cake pan in moderate oven at 375° F. about 20 minutes. Recipe for Chocolate Icing and Filling is in the Magic Cook Book.

### Why Magic Baking Powder is used exclusively at this Montreal School of Domestic Science

"We teach our students only the *purest* magic," says Madame R. Lacroix, Assistant Director of the Provincial School of Domestic Science, Montreal. "That's why I always use and recommend Magic Baking Powder. Its high leavening quality is always uniform. You get the same satisfactory results every time you use it."

And Magic Baking Powder is the unquestioned choice in the majority of cooking schools throughout the Dominion. Cookery teachers—and housewives, too—prefer Magic because of its consistently better results.

**Free Cook Book**—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

Made in Canada

### Record For Survey Ship

#### Government Vessel Sets Mark For Far North Sailing

Completing what is said to have been a new record in far north sailing, the S.S. Ocean Eagle, government survey ship, in command of Captain William Poolok, returned to Churchill after a 17-day voyage into the Foxe Basin regions. The "Eagle" steamed near the southern extremity of Cockburn Land, east and slightly south of the magnetic pole. It is stated that no steamer of the proportions of the "Eagle" had sailed so far north in that area east of Baffin Island.

Cork, Irish Free State, is eliminating its stumps.

## FAVOR EQUALITY IN ARMAMENTS FOR GERMANY

London, England.—Germany's demand for equality in armaments received enthusiastic support from Arthur Henderson, president of the world disarmament conference.

Speaking before the national peace council, Mr. Henderson, who was foreign secretary in the last British Labour cabinet, called upon the allied powers of the World War to carry out the disarmament provisions of the Treaty of Versailles.

"Why shouldn't the World War allies get together and recognize that what was said in their names in 1919 must bind them?" Mr. Henderson demanded.

"Why should they not publicly declare their intention to remove Germany's position of inferiority with all possible haste and to restore Germany's equality in military status?"

Mr. Henderson will leave for Geneva to make preparations for the impending resumption of the disarmament conference. Admitting frankly that he was dissatisfied with the results of the conference thus far, he asserted it would be an "intolerable jest" if it failed.

The great mass of British opinion would rejoice in disarmament, Mr. Henderson said.

"We should greet with enthusiasm the abolition of monster battleships, submarines, tanks, huge land guns and, more than anything, that devilish form of warfare, air bombing."

"At last we are tired of tyranny of the armament mongers and are ready for any measure that will put an end to it."

He asserted he could not believe that "the statesmen who are to be assembled at Geneva in the course of the next few days are prepared to take responsibility for encouraging a competitive race in armaments and its inevitable danger of war."

"The claim of Germany to re-arm will present the conference with a most crucial question. If Germany withdrew from the conference she might estrange opinion in Europe. Surely there is a better way and I hope the better way will be taken."

### Will Reside In West

Earl of Egmont Has No Idea Of Forsaking the Foothills  
Macled, Alberta.—The Earl of Egmont, Alberta's 19-year-old rancher-earl, has no idea of forsaking the foothills and taking up residence with his young bride in England.

Passing through Macled from the Pacific Coast, where the newly wedded couple spent their honeymoon, the earl declared he would reside at his little ranch at Fridley, Alberta. He said he would make his home in the foothills, the land of his childhood.

The earl was married quietly in Calgary three weeks ago to Miss Anne Moodie, 19-year-old Calgary girl. Following the ceremony they left for Vancouver via Jasper Park. They will continue their honeymoon journey into the United States.

### Gandhi's Threat

Effort Being Made To Prevent Mahatma From Starving Hunger Strike

Simla, India.—Powerful efforts are being organized to deter Mahatma Gandhi from carrying out his threat to start a hunger strike.

The victory talked for an hour with Rao Bahadur, representative of the untouchable class in the assembly, who appealed to all classes to strive to save the life of "the greatest Indian of our time."

The Pandit Malaviya, Hindu leader, was summoned to a conference at Delhi in the hope of reaching an early agreement regarding representation of the untouchables, the issue which influenced Gandhi to threaten his campaign of starvation.

### Married School Teachers

Calgary, Alberta.—Women school teachers whose husbands earn good salaries may be dismissed by the Calgary School Board. At a recent meeting the school board decided to investigate and ascertain the number of women teachers on the staff whose husbands received sufficient wages to run the house without their wives working.

The Nanking government plans to erect a radio station capable of communicating with any station in the world.

W. N. U. 1940

## Farmers Hold Wheat

Alberta Farmers Show Tendency To Wait For Higher Prices

Calgary, Alberta.—Alberta farmers are showing a tendency to hold their wheat until higher prices appear, according to grain trade heads in Calgary. Farmers are being given an average price of 32 cents per bushel No. 1 Northern.

Alberta wheat pool officials state farmers feel grain should be held at all places where facilities are available. Storage places, however, are lacking in some centres and it is feared congestion may result in many districts.

Some farmers are urging that coarser grains also be retained until prices improve. They point out that present prices made delivery hardly worth while as No. 2 C.W. oats brought only 13 cents per bushel, No. 3 C.W. barley 12 cents, and No. 2 C.W. rye 13½ cents.

Pool heads strongly denied farmers in some districts were forming organizations for the purpose of holding all their crops.

## Sees Better Times

Speaker At Chamber Of Commerce Gathering Looks For Improvement

Halifax, N.S.—Declaring Canada is "on the threshold of the upswing," President W. L. McGregor, of Windsor, Ont., gave a keynote of optimism to the seventh annual convention of the Canadian Chamber of Commerce.

"I am glad to be able to state that it is not only my opinion, but the opinion of many leaders that we are on the threshold of the upswing," he said.

But Colonel McGregor wished to make it clear he was not suggesting the advent of recovery.

"How could anybody seriously forward the idea of the advent of recovery with 14,000,000 unemployed on this continent alone?" he asked.

He was wary of the spectacular rise in stock prices.

## Slayer Pays Penalty

Russian Who Shot French President Dies On Guillotine

Paris, France.—Paul Gorguloff, half-mad Russian adventurer, died on the guillotine at Saint prison for the assassination of President Paul Doumer of France. The knife of the guillotine fell at dawn 6:03 a.m.

The Russian fanatic's last hope of escaping the razor-edged knife of "The Widow" passed when President Albert Lebrun, who succeeded Doumer, rejected his appeal for a commutation.

Dr. Gorguloff was not told of the president's decision until a half hour before his execution, in accordance with French law and custom. Then he was awakened by his guard and lawyers, informed of the appeal's failure, and led unceremoniously to the guillotine.

## Freight For Bay Route

Will Shortly Discontinue Solicitation Of Freight For 1933 Season

Ottawa, Ont.—While the government takes no part in the operation of the Hudson Bay Railway and the Port of Churchill, the information that the Canadian National Railway will shortly discontinue the freight solicitation service for the new route is unofficially confirmed here.

The railway has been pushing the Hudson Bay route strongly in the past few months, but this effort will be stopped shortly prior to the closing of the Hudson Bay navigation season. The chief motive in discontinuing the service is to economize, but it is pointed that there is little purpose in soliciting freight for 1933 at this time.

## Remembrance Day

War Veterans Favor Stricter Observance Of Anniversary

Vancouver, B.C.—Believing that the importance of "Remembrance Day"—November 11—is not fully realized by the Canadian people, the eleventh annual convention of Amputations' Association of the Great War passed a strongly worded resolution favoring stricter observance of the anniversary.

"We pledge ourselves to do all in our power to see that this day shall be sacred in our national life," the resolution declares. "We further appeal to the industrial and commercial life of Canada to follow the splendid example set by dominion, provincial, and municipal governments in closing down all but necessary works on 'Remembrance Day'."

## No Fall Session

No Early Sitting Of Alberta Legislature Expected

Edmonton, Alberta.—A fall session of the Alberta legislature is not likely, it is stated by Premier Brownlee, and the action of the Dominion Government in calling parliament for October 6 will not have any effect upon the situation in this province so far as its own house is concerned.

Unless some unexpected emergency arises, it will not be necessary to call a sitting of the legislature before Christmas, said Premier Brownlee. If economic or other conditions should become sufficiently serious, it might be found desirable, but there does not appear at present, the premier said, any reason for such action this fall.

Mr. Brownlee intimated, however, that in any case as early a date as possible after the new year will be arranged for the regular session.

## Dairy Barn Destroyed

Heavy Loss Sustained By Farmer Near Moose Jaw

Moose Jaw, Sask.—The huge barn of Fred H. Jones, prominent dairy farmer living two miles north of the city, was completely demolished by fire, incuring a loss estimated at \$23,000. Starting either from spontaneous combustion or from a short circuit in the electric wiring of the barn, the fire blazed uncontrolled for three hours.

The barn, measuring 270 feet by 96 feet, was valued at close to \$20,000, the feed which was stored inside was valued at \$2,000, milking machine equipment was valued at \$1,000, and 12 sets of harness were valued at about \$500. All these were a total loss.

## FREE STATE STILL CONCERNED OVER LAND ANNUITIES

Dublin, Irish Free State.—Both governments continue to maintain the strictest silence concerning the terms of the latest note from the Free State to the United Kingdom in the dispute over the land annuities, but it was reported that President Eamon de Valera had declared that in event of failure to reach an agreement on the method of arbitration, he would use the monies so far withheld for the "relief of sufferers from the economic warfare."

The Free State so far has withheld payments of about \$10,000,000 on account of failure to reach agreement on the form of arbitration of the dispute—the Free State holding out for an international tribunal and the British government for an Imperial arbitral board.

President de Valera is expected to visit London for a day or so, and have a final interview with J. H. Thomas, Secretary for Dominion Affairs, before leaving for Geneva to attend the sessions of the league assembly.

## COMMENCES BIG WORK

James Purves, heraldic artist of London, Ontario, who has been given the task of inscribing some 68,000 names in the Book of Remembrance, which will be placed within the cockpit of the Altar in the Memorial Chamber at Ottawa. The names will be written by hand on fine calfskin vellum.

## Aviators Burned Alive

Pilot and Pupil Met Horrible Death At Montreal

Montreal, Que.—Two men were burned alive in an aeroplane here as the machine went out of control and crashed to the ground. They were Captain Eliaze A. Lebeuf, chief instructor of the Montreal Light Aeroplane Club, and C. W. Chambers, a student pilot.

Lebeuf had taken Chambers up for one of his final lessons in "spins" and "dives." The machine was seen to falter when about 1,000 feet up. There was a roar when flames suddenly appeared about the engine and swept back over the occupants.

The plane then dove into a farmer's field near St. Hubert airport. There was an explosion as the machine struck the earth. So intense was the heat, no efforts at rescue could be made.

Captain Lebeuf was one of the most proficient flying instructors in Canada. He learned to fly in Windsor, Ont., and later joined the Royal Canadian Air Force. At Camp Borden he was regarded as one of the three outstanding instructors there.

A coroner's jury investigating the mishap returned a verdict of accidental death on both victims.

## Pay Roll Robbers

New Type Of Tear Gas Gun Is Demonstrated

Chicago.—Pay roll robbers are going to shed a lot of tears.

A new type of tear gas gun, so small it can be concealed in a coat sleeve and reputedly of sufficient power to route a whole gang of pay roll robbers was demonstrated at the Northwestern University Crime Detection Laboratory here. It is fastened to the wrist like a strap watch. A fine wire leads from the trigger to a ring in the middle finger. All one needs to do is lift up the arm and flick the finger and the trick is done.

## Says Empire Threatened

British Ideals Of International Trade Are In Danger

Toronto, Ont.—Suggestion that the very civilization Great Britain had created might destroy her in the end was made here by Dr. T. E. Gregory, of London, one of the world's leading economists, in an address. Cabinet ministers, professors, bankers and outstanding business men were in his audience.

Dr. Gregory questioned whether the British ideals of international trade and commerce would win out or whether the American ideal of less interest in international trade and more in mechanization of production would prevail in the next two decades.

"Do we want civilization of the kind this country has created, and which may destroy my country in the end, or the kind America has created and may carry to a very triumphant conclusion?" Dr. Gregory questioned.

There was going on in the world a revolution in raw material that could not be checked, said Dr. Gregory. The raw material producing areas were going to resort to manufacturing in order to keep those busy who were being driven from the land.

## United States Farmers

### Buy Manitoba Land

More Than Two Hundred Families Coming To Canada

Winnipeg, Man.—Over long distance telephone from Des Moines, Iowa, Senator L. E. Francis confirmed his association with W. J. Whidden, manager, in the purchase of 10,000 acres of farmlands in Manitoba for United States farmers.

Mr. Whidden, who telephoned Senator Francis when shown a despatch from Des Moines quoting Mr. Francis as saying "nothing to it," showed the Canadian Press reporter the title to the property and his contract with the United States senator.

With other parties Mr. Whidden is negotiating for 25,000 more acres in Manitoba. More than 200 United States farmer families will settle on the total acreage, he said. These farmers are coming to Canada, he said, because of higher prices received for farm products in Canada and the fertility of Manitoba soil.

## OTTAWA SESSION LIKELY TO MAKE NEW HISTORY

Ottawa, Ont.—Canada's parliament convening on October 6 will make new history.

Signs portend a four weeks' sitting of parliament in the fall devoted almost entirely to intra-empire trade. Perhaps even three weeks may suffice. To some extent opposition members will be a determining factor. And from that quarter there has been no official expression of views on the results of the Imperial Conference.

Not only even approval of the trade pacts will probably take place in time for adjournment on or before November 15. A recess until January 15 is expected.

The legislative programme when parliament reassembles in January will probably comprise:

(1) Legislation on the report of the transportation commission, headed by Mr. Justice Lyman P. Duff, of the supreme court of Canada.

(2) Approval of the Canada-United States St. Lawrence seaway treaty providing ratification has been already given by the United States senate.

(3) Amendments to the Finance Act.

(4) Introduction of redistribution bill.

From present indications, the budget will probably be brought down late in February. Like the financial statement, the main estimates will not be tabled until early next year. Preliminary work on the estimates will likely be under way shortly.

A bill for redistribution of Dominion constituencies always follows the completion of Canada's census every ten years. From the viewpoint of suggesting an election the measure consequently has no significance whatsoever.

Usually contentious amendments to the redistribution act go through a committee before being submitted to the Commons for enactment. This course will be followed during the coming session, it is stated.

The Finance Act in all its ratifications will likely be reviewed by a special committee. Amendments to the act are promised for early next year.

## SHOULD EXTEND SHIPPING SEASON ON BAY ROUTE

Ottawa, Ont.—The Canadian government is moving to lengthen the shipping season out of Churchill, Manitoba's seaport on Hudson Bay, which, under existing insurance regulations, will have finished its first season of activity on a commercial basis at the end of this month.

Lowest insurance rates on shipping through Hudson Strait expire September 30. By paying additional insurance it can be extended to October 7.

The government marine department has made representations to the marine insurance underwriters against the insurance expiration date, it was stated here, urging that instead of a fixed date arbitrarily set, the date should be movable, dependent on the season.

Officials of the department are confident the Hudson Bay route will be perfectly safe for shipping at least until the end of October this year, as it was last. But so far insurance underwriters have not agreed to set back the date on which lower insurance rates expire.

Seven vessels have picked up grain cargoes at Churchill since July this year, carrying a total of more than 2,000,000 bushels to Europe via the northern route. Still in store in the government-owned elevator at the Manitoba port are 1,250,000 bushels which might be moved out, it is held, if low insurance rates are left in effect until late in October.

## Trade With Russia

Report Canada Will Exchange Aluminum Products For Crude Oil

New York.—The Aluminum Company of Canada, Ltd., has contracted with the Soviet government to exchange aluminum wire for crude oil, says the New York Times. The first shipments of oil are now en route to Montreal, the paper says.

The transaction was disclosed by the newspaper as the first of a series by which Russia will buy goods from Canadian industries through the barter system.

An arrangement has been made by Aluminum with the Saudi Oil Company for the latter to refine oil and to distribute the product throughout Canada, the paper proceeds.

Russia will utilize the aluminum wire in its vast electrification programme, it is said, and is negotiating for the barter of oil and coal and other raw materials in exchange for items essential to the success of its industrial development.

## British Motorists Pay More For Gasoline

Price Has Been Increased Nearly Twenty Per Cent.

London, England.—British motorists were hit by an increase of nearly 20 per cent. in gasoline prices, raising the standard grade to 39 cents a gallon.

The London Omnibus Company estimated the rise would increase its expenses more than \$1,000,000 a year. News of the increase caused a sharp rise in the price of oil.

The growing army of small car owners had hoped the oil war which has given them cheaper gasoline would continue indefinitely but the inclusion of Roumania and Russia in an agreement ended the price cutting.

## Support Is Withdrawn

Kaye Don Loses Sponsor In Speed Boat Racing

New York.—Kaye Don, British speedboat driver and holder of the world record with Lord Wakefield's "Miss England III," said he knew of no one in England who might take his former backer's place as sponsor of speed boat racing.

Lord Wakefield withdrew his support of Don and said he planned to withdraw entirely from further speedboat ventures.

Lord Wakefield is said to have spent at least £1,000,000 in the last few years promoting automobile, speedboat and airplane speed ventures.

## Reduced Unemployment

Calgary, Alberta.—Harvest work has reduced Alberta unemployed figures by 1,699 compared to the same period last year, according to the province's unemployment service. There are 7,500 men still unemployed compared to 9,214 at this time in 1931.

## COMPLETION OF CANADA'S WAR MEMORIAL

Canada's War Memorial, which will in due course be erected on Parliament Hill, Ottawa, has now been completed at Farnborough, Kent, England, and for a short period will stand in Hyde Park, London, England. This picture shows the six March Brothers and sister standing before the three gigantic figures which form part of the memorial. The memorial consists of a huge arch through which pass representatives of the services who responded to the call for men during the World War.

# Challenge Government Statements As to Possibilities of Commercial Fishing In Hudson Bay Waters

Strong criticism of the Dominion Government report on the commercial fishing possibilities of Hudson Bay and Straits, is made in an analysis prepared by the Fish Committee of the Industrial Development Board of Manitoba, following release of the findings of the Hachey investigations of 1930.

Mr. Hachey's statement that "as a result of the total work covering the whole of Hudson Bay, not a single commercial fish was taken, hence it is quite easy to arrive at a definite conclusion that a deep water fishery of commercial importance does not exist in Hudson Bay," is challenged by the Committee with abundant evidence gathered from eminent authorities. This evidence indicates that commercial fish in substantial quantities do exist in both the Bay and the Straits.

The committee points out that, although the expedition left Halifax on July 26, returning on September 20, it actually spent only 80 hours in fishing operations.

Seven hours 15 minutes with drift lines; 12 hours 15 minutes with hand lines; 2 hours 55 minutes with long lines; 57 hours 50 minutes on trawling operations.

It further points out that, although the superficial area of Hudson Bay is 576,000 square miles, the record of sailing times supplied by Mr. Hachey shows that the expedition traversed, in the process of investigation, less than 5,000 nautical miles.

The report refers further to the fact that for seven days investigations were conducted without bait.

The committee's report gives detailed information regarding the investigation of Dr. Alexander Bakjov, who is affiliated to the Biological Board of Canada, at the University of Manitoba. This information proves the presence of commercial fish in Hudson Bay. Dr. Bakjov has in his possession specimens of cod caught by Mr. Hachey during his expedition. These cod are very small and young and thus might not possibly be brought within Mr. Hachey's category of "commercial fish," but the committee claims they constitute definite evidence that cod do exist in Hudson Bay and that the scientific evidence submitted by Mr. Hachey to the effect that the waters of the Bay were too cold for reproduction, is open to question.

Dr. Bakjov is an eminent authority on the fish industry and has in his possession records of other expeditions into the White Sea and Arctic Ocean, in which the latitudes traversed and the equipment used are almost exactly similar to those of Mr. Hachey's expedition. This information indicates that had the Hachey expedition continued operations into September, it is quite possible that they would have found an entirely different situation in connection with the supply of cod in Hudson Bay waters. In the month of September, the Russian expedition found gigantic schools of cod in almost exactly the latitude of Hudson Strait and under similar conditions all around, except that their expedition continued a little later in the season. Mr. Hachey, with Halifax as his base and having to return there before winter set in, could not prolong his investigations to that date, but nor could anyone working from Halifax. But an expedition working from Churchill could do so and might conceivably find cod in September.

**Should Eat More Cheese**

Canadians could do much for a great industry as well as contributing to their own sustenance in the use of a cheap and nutritive diet by a greater consumption of cheese. It should be made a staple food and be found on the table at all times.

Over 251 million acres were sown to wheat in the world last year.

"What is the matter?"

"Ah, Doctor, I can hardly get my arms over my head—and it is nearly the same with my legs."—Lustige Kiste, Leipzig.

W. N. U. 1936

## Combine Harvester and Wheat Quality

Complaints Made That Grain Goes Out Of Condition In Storage

The combine has come into the Canadian West in large numbers in the last few years, and complaints have come from grain companies, who have to keep grain in storage in elevators, that the grain goes out of condition in storage. They claim that the grain appears to be "straight" when it comes in (i.e. containing not over 14.5 per cent moisture), but that it spoils in storage, and when they look into its history they find that it is combined grain, cut and threshed without curing in the field.

The committee has arranged to attack this problem in a comprehensive way in all three provinces this season. Starting with a survey of the moisture content of the standing crop as it approaches maturity, numerous samples will then be taken from different types of harvesting and threshing methods, including the binder, the combine-thresher, the straight combine, and the header-barge methods. The co-operation of both farmers and grain men has been secured, so that the grain can be followed through storage to see what changes take place. Fundamental studies have been started on the process of "weathering" in storage. Out of the whole investigation it is hoped to obtain information that will make possible a statement of what is safe to do, whether the new methods of harvesting should be modified, or whether they are safe if practiced with suitable precautions.

## Wheat Exports

Sharp Increase Is Shown As Compared With Last Year

A sharp increase in the export of wheat, with western Canada's main export, Churchill, taking its place in the record, is shown in a report issued by the Dominion Bureau of Statistics.

In the five weeks ended September 1, export clearances amounted to 16,782,749 bushels. This compares with 10,475,000 bushels for the corresponding period last year. Practically one-half the clearances since August 1 have been through the port of Montreal, while Vancouver has handled about one-quarter of total clearances. Shipments from Churchill totalled 32,713 bushels during the five-week period. Both Montreal and Vancouver, 4,017,145 bushels, show heavy increases as compared with a year ago.

A feature of the bureau report is the statement the clearances of Canadian grain through United States ports show a marked decrease. The shipments since August 1 have totalled only 1,973,000 bushels compared with 3,384,000 bushels shipped during the same period last year.

## University Work Co-Ordination

Working Plan For Four Western Institutions Has Possibilities

Co-ordination of the work of the four provincial universities in western Canada is not a new subject, according to Dr. James A. MacLean, president of the University of Manitoba. The matter has been considered from time to time by a committee of the Canadian universities conference.

In Dr. MacLean's opinion the proposal contains possibilities worthy of attention. He had not heard of latest proposals of Premier Brownlee of Alberta and declined to discuss the matter in detail. On the angles from which the question had been considered in the past was the emphasis in certain universities on some of the professional schools. For instance, the University of British Columbia might develop its school of marine engineering to a high degree and leave to other universities the task of developing high grade schools in other branches. By co-operation and agreement along this line there was an opportunity of avoiding unnecessary duplication and saving expenses.

## Much Ado About Nothing

"So you told Mrs. Brown, did you? And what did Mrs. Brown say?" the defending counsel asked the witness.

Opposing counsel objected to the question as irrelevant, and a long and heated argument ensued before the judge allowed the question to be put. "Now," exclaimed the triumphant counsel turning again to the witness, "what did Mrs. Brown say?"

"Nothing," was the reply.

## Arranging For World's Fifth Poultry Congress

Italy Making Great Preparations For Show Next Year

Prof. Alessandro Ghigi, director-general of the 1933 World's Poultry Congress, was in Ottawa recently in connection with the fifth congress. Prof. Ghigi interviewed the Federal Minister of Agriculture concerning Canada's participation in the congress, which takes place in Rome, September, 1933. In addition to this he discussed with Canadian members of the World's Poultry Science Council details of the congress.

According to the congress director-general, Italy is making great preparations for this event. The show will take place in the ancient market of the Trojans. The "market" is a circular gallery, six storeys high, with an old Roman "road" leading to each tier. From these "roads" open dozens of rooms in which the exhibits will be placed. The King of Italy is the Royal patron and will probably open the congress in person. Mussolini heartily endorses the congress and it is expected will be present some time during the exhibition to meet the delegates.

## Farms in Canada

Heavy Increase In Number Of Farms In Last Ten Years

There were 17,574 more farms in Canada at the time of the 1931 census than in 1921, according to figures issued by the Dominion Bureau of Statistics. The total for 1931 was 728,964, and for 1921 it was 711,000.

There were decreases in the eastern provinces from Ontario to the sea, but increases in all the other provinces. Saskatchewan showed an increase of 17,021 in the decade, Alberta 14,454, British Columbia 4,106, and Manitoba 947. There were 41 farms in the Yukon.

Prince Edward Island had a decrease of 886; Nova Scotia, 7,988; New Brunswick, 2639; Quebec, 1,660, and Ontario, 5,879.

There was a total of 586,229 farms owned by their occupants, 74,382 tenanted and 67,942 partially owned. Full ownership of farms decreased 4 per cent in the decade, while tenant farms increased 33 per cent.

## Empire Trade Ship

May Sell From England For Canada Next Spring

Response from manufacturers and exporters in the United Kingdom to an invitation to display their goods on the benefit of Canadian buyers at Montreal on the liner "Laurentine" has not been sufficient to justify the sailing of the vessel on October 1.

Numerous firms have indicated they are awaiting publication by the United Kingdom and Canadian Governments the decisions arrived at during the Imperial Conference at Ottawa before exhibiting their goods.

As these decisions will probably not be made public before the end of October, it is hoped the empire trade ship will sail for the Dominion next spring.

## "Getting Even" Is Costly

Means Harm To Higher Character And Self-Respect

You cannot "get even" with one who does you an injury except by getting on his level; that is what evenness means. No possible ill from without can be equal to the harm you can inflict upon yourself by shining against your own higher character and self-respect. "Getting even" with wrong, injustice and selfishness is too costly an indulgence to be allowed.

This year 4,000,000 British subjects in England must pay an income tax. Last year the number was 2,250,000.

Foreman: "Hi, why aren't you getting on with yer washing?"

Workman: "Bill accidentally fixed the pall to the minute hand, but it'll be round again in half an hour."—The Humorist, London, England.

## Winnipeg Newspaper Union

(By Ruth Rogers)

773

A YOUTHFUL DRESS FOR THE COLLEGE MISS, HIGH SCHOOL GIRL AND YOUTHWFUL WOMEN TYPES

Still another new and lovely style with smart sportive-air for fall school wear.

It's equally suited for office, street and general day occasions.

It adapts itself to the new fall woolsens, so soft and lovely in texture.

A rhum-brown diagonal woolen made the original.

Twined mixture in wine-red coloring, is so effective.

It's a model that also makes up attractively in rough crepe silk or wool crepe.

Style No. 773 is designed for sizes 14, 16, 18, 20 years; 36, 38 and 40 inches bust.

Size 36 requires 3 1/2 yards of 36-inch material with 1/2 yard of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (if preferred). Wrap coin carefully.

## Trainsmen Were Puzzled

Trainsmen Puzzled By Ants Breaking Contract In Signal Box

Ants, common red ants, stopped traffic on the Louisiana division of the Texas & Pacific Railroad for a time, much to the annoyance of everybody.

Passenger train No. 24, eastbound, encountered a red light near Scottsville and halted. Trainsmen were unable to find the cause. Train No. 26 had the same trouble. An investigation revealed that ants had worked into the signal box and formed the contact. Many ants had been electrocuted, breaking the current and causing the signal to remain red.

# Survey Results In Better Picture Of Weed Problem In the West And Points To Possible Remedy

## Intelligence and Ability

Are One and the Same Thing, So Scientists Say

Intelligence and ability are the same thing, and both are "inborn," the British Association for the Advancement of Science was told.

The man with the highest intelligence is the man with the greatest number of inborn abilities, Prof. W. McDougall, noted psychologist, said. The difference in intelligence between man and the lower animals is really a difference in inborn abilities.

Intelligence, he explained, is a sort of outgrowth of instinct, and both are based on two things—propensities or "natural bent," and abilities. Instinct is a close linking-up of a "natural bent" with some particular ability. This close combination of the two governs action of lower animals.

The secret of the ability of migrating birds to find their way accurately over long distances probably lies in powerful eyesight, enabling them to note landmarks, Prof. C. G. Patten told the association.

He expressed doubt that birds have an instinctive "sense of direction." Young birds are guided by older birds who have been over the route before.

## Facts About Tobacco

Weed Is Grown In Nearly Every Province Of The Dominion

Here are some interesting facts about tobacco growing in Canada supplied by the Department of Agriculture at Ottawa.

Tobacco growing was introduced by French settlers in the early colonial days; Government assistance was first given in 1735.

In 1871, the year of the first decimal census, production was estimated at 399,876 pounds for Ontario and 1,195,345 pounds for Quebec.

In 1931 there were some 7,200 farms producing tobacco in Ontario and Quebec, and approximately 70,000 persons were engaged in the production or manufacture of tobacco and its products.

Tobacco is grown in nearly every province in the Dominion;

Canada's production of commercial tobacco for 1931 was estimated at 51,000,000 pounds.

## Backboard May Have To Go

Residents Of Ilesboro On Penobscot Bay Want Cars

Few isolations are secure against the forward march of the automobile. Even Bermuda, in mid-ocean, has to be on the alert to vote down the motor threat to her repose. On Ilesboro, however, on Penobscot Bay, the backboard still reigns. Ten miles from shore, Ilesboro has ward off the automobile, and most of the summer residents would gladly keep the machines at arm's length indefinitely. But the permanent residents have grown restive at being deprived of a lively and entertaining instrument of civilization. They want automobiles more than they want quiet and are likely to get them, for the issue is coming up at a special town meeting.

## Support Is Promised

Canadian Provinces All Interested In Success Of Grain Show

All Canadian provinces are enthusiastically supporting the World's Grain Exhibition and Conference, according to reports from those who attended the recent gathering of Federal and Provincial representatives called together at Toronto by Hon. Robert Weir, Federal Minister of Agriculture.

During the meeting, Hon. W. C. Buckle, Minister of Agriculture and chairman of the exhibition and executive, conferred with representatives of the provinces and technical men of the Federal Department of Agriculture upon matters in connection with the show at Regina next year.

## Scotland Wants Quiet Sunday

Scotland's annual campaign for quiet Sunday observance is being waged more vigorously this year than ever. Church meetings are being held in large cities, and prominent churchmen are denouncing Sunday trading, Sunday excursions and Sunday movies.

Compulsory insurance for autobus passengers has been decreed in Jugoslavia.

In response to requests from numerous organizations in western Canada a conference on the destruction of weeds by means of chemicals was called in Edmonton in the fall of 1929.

This conference asked the National Research Council to undertake a programme of research with reference to the destruction of weeds and recommended strongly that the program should not be limited to the use of chemical weed eradicators. The Council exhibited an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem, and the committee then undertook the task of developing a programme co-ordinating as far as possible all activities in the entire field of weed control investigations in the prairie provinces.

One of the committee's first actions was to initiate a weed survey. A special investigator was appointed to study and compile the results of surveys by the provincial departments of agriculture in the prairie provinces and to make a personal reconnaissance of this area. This work he carried on for two years, then prepared a report which is now in press, and which, with its accompanying maps showing the distribution and prevalence of the worst weeds, gives a better picture than we have had hitherto of the weed problem in the West and the kind of action required to meet it.

The provincial departments of agriculture undertook a programme of field experiments with chemicals, under a system carefully planned in conference. Grants were made out of funds placed at the disposal of the Committee by the National Research Council, to assist various university workers in the investigation of some of the more fundamental aspects of the problem, such as the growth habits and root systems of weeds, the diseases of weeds (which may spread to crop plants), and the effects on the soil of chemicals applied for weed control.

At the last meeting of the committee, representatives of the Federal and Provincial Departments of Agriculture, and of the universities, recommended unanimously that a popular bulletin should be issued, discussing weed control in the light of these newer investigations. This bulletin is now in press.

The Division of Biology and Agriculture of the National Research Laboratories undertook an extensive programme of research on the use of chemicals as weed killers. This included the testing of a wide variety of chemicals with a view to finding useful ones, and the investigation of their effects on plants as modified by a large number of factors in the plant, in the environment, and in the mode of employing the chemical. The first part of this work was done in the use of chemicals, a common ingredient of commercial weed killers, and similar substances. A paper is now in press showing clearly the conditions under which it is safe and sound to use such materials.

These studies, in some of their more fundamental aspects, will be continued to still better advantage in the new laboratories at Ottawa, where there will be facilities for controlling growth conditions, thus making it possible to observe accurately the effect of any chemical treatment applied to the weeds.

Vicar, to victor in local fight—"I understand you have been indulging in a pugilistic encounter, and that you have severely injured your opponent. Is that true?"

"The answer is in the affirmative," was the reply.

"Darling, I am tired. I am half dead."

"Just like you to do everything by halves."—Moustique, Charleroi.

# LAVERBILT

## LOW PRICES

Now—EVEREADY LAVERBILT, the most powerful, longest lived radio battery ever made, at a price that makes it the most economical "B" battery you can buy.

Packed with more power-producing, active material than has ever before been put into a radio battery—giving smooth, full power for an amazingly long time—these batteries offer a new conception of radio battery economy. Large size \$3.95 Medium size \$3.00.

## THE HOUSE OF DREAMS-COME-TRUE

—BY—  
**MARGARET FIEDLER**  
Author of  
"The Splendid Folly," "The Hermit  
Of Far End,"  
Hodder & Stoughton, Ltd., London

### CHAPTER XXXI.—Continued

Tortured beyond bearing, this final taunt, levelled at the woman he held more dear than anything in life, snapped his last thread of self-control.

He flung himself forward and his hands were gripping, gripping at the soft ivory throat from which the taunt had sprung. He felt the woman writhe, struggling to pull his hands from her neck. But it needed nothing to him. He did not think of her any longer as a woman. She was something vile—leprous to the very core of her being—a thing to be destroyed. The thing which had made of all Jean's promised happiness a black and bitter mockery.

The mad Tormarin rage surged through his veins like a consuming fire. He would break her—break her and utterly destroy her just as one destroyed a deadly snake.

And then across the thunderous roar that beat in his ears came the beloved voice, the voice that would have power to call him out of the depths of hell itself—Jean's voice, "Blaise! Blaise! What are you doing? . . . Stop!"

### CHAPTER XXXII.

#### The Dividing Sword

Slowly, reluctantly, Tormarin's hands loosened their clasp of Madame de Varigny's throat, and with a swift, flexible twist of the body she slipped aside and stood a few paces from him.

Jean looked from one to the other with horrified eyes.

"Madame de Varigny?—Blaise?" she stammered. "What is it? . . . Why, you—you might have killed her, Blaise!"

He stared at her blankly. His reason of the Italian woman had been in mere blind response to Jean's first imperative appeal that he should desert. But the mist of unguaranteed anger had hardly yet cleared from

his brain; the blood still drummed in his ears like the roar of the sea.

"Blaise"—Jean spoke impudently. "What were you doing? Tell me!"

With an effort he seemed to recover himself.

"It's a pity you didn't let me finish it, Jean," he said harshly. "Such women are better dead."

Madame de Varigny was fingering her neck delicately where the pressure of Blaise's grip had scored red marks on the cream-white flesh. She seemed quite composed. Her smile still held its quiet triumph and her long dark eyes gleamed with the same mockery that had brought her within measurable distance of quick death.

"As Monsieur Tor-ma-rin seems to find a difficulty in explaining—permit me," she said at last. "He was angry with me because I bring him the good news that his wife is still alive, that he need mourn no longer."

"While she spoke her eyes, resting on Blaise's mask-like face, held an expression of malicious satisfaction.

"His wife . . . alive?" repeated Jean dazedly. "Blaise, is she mad? Nests has been dead years—years!"

Then, as he made no answer, she continued rapidly, a faint note of fear vibrating in her voice: "Isn't it so? Blaise—speak! Quickly, tell her—Nests has been dead years!"

"He cannot tell me anything about her which I do not know already,"

Mess Peterson, seeing that she is my sister and has been living with me ever since her husband's cruelty drove her from his home."

"Is it true, Blaise?" whispered Jean.

Belief that some substance of horrible truth lay behind the Italian's coolly uttered statements was beginning to lay hold of her.

"Blaise, Blaise"—her voice rising a pitch—"say it!—her—tell her it isn't true!"

He looked at her speechlessly, but the measureless pain in his eyes answered her more fully, more convincingly than any words.

"You see!" broke in Madame de Varigny triumphantly. "He cannot deny it! It was I who told him of her death and I who now tell him that she still lives. Listen to me, mademoiselle, and I will recount you how—"

"No!" interrupted Jean proudly. "Whatever there may be for me to hear, I will hear it from Blaise—not from you."

She turned again to Tormarin. "Tell me everything, Blaise," she said simply.

He took her outstretched hands and drew her slowly towards him. No one, reading now the calm address, the stern imprint of endurance on his face, could have imagined it was that of the same man who, a few moments earlier, had been swept by such a tempest of uncontrollable anger.

"Jean," he said very gently and pitifully. "I'm afraid that what Madame de Varigny says may be true. I have no proof that it is not."

"Nor have you any proof that it is," broke in Jean swiftly. She swung round on Madame de Varigny. "Where is your proof—where is your proof?"

The Italian smiled. "Monsieur Tor-ma-rin will find his wife in my car. I bade the chauffeur wait with it at the lodge gate."

"Do you mean you have brought Nests—here?" cried Blaise.

"Why not?" replied Madame de Varigny, with a return to the same exasperating complacency with which she had originally described her whole scheme of revenge. "And—here? Surely her husband's house is the proper place to which to bring his wife?"

"She cannot remain here," said Blaise with decision.

"No? For the moment that was not my idea. I brought her with me because I thought there could be no more convincing proof."

Blaise looked at her searchingly. He fancied he detected a false note in her voluble speech, and a new idea, presented itself to him. Was the woman simply putting up a gigantic bluff? Or was really Nests, his wife, waiting in the car at the lodge gates? It occurred to him as perfectly feasible that it might be merely some woman whose remarkable resemblance to the dead girl had suggested to the Countess's fertile brain the scheme that she should impersonate her.

His mind seized eagerly upon the idea, bolstering it up with Madame de Varigny's own admission. "I made it the changes in her appearance," she had said. "The colour of her hair, the way of dressing it." Probably she was relying on those "little changes," on the blurred recollection resulting from the length of time which had elapsed since Nests's death, to aid her in her plan of producing as his wife a woman who closely resembled her. He felt morally sure of it, and the light of hope suddenly arose bravely.

"I believe you are deceiving me," said quietly. "Lying—as you have lied so often through the place. Tell me, what is the truth?"

"I see this wife you are waiting to see in the car for me"—grimly. He turned to Jean. "Keep up your courage, sweet-heart," he said in a low voice full of infinite solicitude. "I believe the whole thing is a put-up job to separate us."

Jean smiled at him radiantly. She felt at all once very confident. In a few minutes this nightmarish story of a Nests still alive and claiming her rights as Blaise's wife would be proved a lie.

Tormarin crossed the room and opened the door.

"Now, Madame de Varigny—will you come with me?"

The woman hesitated a moment. "Come," insisted Blaise firmly. "Or—are you afraid, after all, to bring me face to face with my wife?"

She shook her head.

"No," she said. "I am not afraid. It is only that I am so sorry—so sorry for the little Jean."

Her eyes, soft and dark and liquid as the eyes of a deer, sought Jean's beseechingly.

"I can so sorry," she repeated. And passed, slowly—almost unwillingly, it seemed, out of the room, followed by Tormarin.

.....

Jean raised her head from Blaise's shoulder and pushed back her hair, damp with perspiration, from her forehead. It seemed to her as though she had been down, down into some awful, limitless abyss of darkness from which she was now feebly struggling back to a painful consciousness of material things. A great sea had surged over her head blotting out everything, and remained poised above her like a huge black arch, imprisoning her in the vast, deserted chaos in which she found herself wandering. Then—after a long time, it seemed—it had surged away again, and she could distinguish Blaise's face bent above her.

"Then—then it's true?" she said stupidly. Her voice sounded tiny, even to herself—a mere thread of sound. Blaise made no answer. He only held her a little closer in his arms.

She supposed he hadn't heard that thin little thread of voice. She must try again.

"Is it true, Blaise? Is Nests—"

## "Birthdays needn't make you Old!"—says Irene Rich

"A screen star never worries about birthdays," this lovely star says, "as long as she doesn't look old. To hold her public she must keep the fresh loveliness of youth."

## TURRET FINE CUT Cigarette Tobacco

But somehow the last words wouldn't come.

She felt his arm jerk against her side.

"Yes," he said baldly. "It's true. Nests is alive. I've seen her."

Jean said nothing. She knew it—had known it all the time the arched wall of sea had kept her down in that awful black waste where there had been neither warmth nor sunshine but only bitter, freezing cold and lightless space. She clung a little closer to Blaise, like a frightened, exhausted child.

"Heart's beloved . . . little dear—est Jean . . ." she heard the wrung murmur of his voice above her head. Then suddenly, his arms tightening round her: "My soul!"

The sunlight still slanted in through the windows, mellow and golden. A ray about of laughter came up from the boat on the lake. The clock on the chimney-piece struck the hour—twelve slow, maddening strokes.

Jean stared at its blank, foolish face. The hands had pointed to half-past eleven when the door of the room had closed behind Blaise and Madame de Varigny. It had taken just a brief half-hour to smash up her whole world—to rob her of everything that mattered.

"I must think—I must think," she muttered.

"Beloved!"—Blaise's voice was wonderfully tender—not with the passionate tenderness of a lover but with a solicitude that was almost maternal. "Beloved, don't try to think now. Try to rest a little, won't you?"

And at that Jean came right back to an understanding of all that had happened, as the needle of a compass swings back to the frozen north.

(To Be Continued.)

### No Aids To Beauty

Women employees to the Bank of England must not use lipstick or other aids to beauty, according to a new rule. They may wear only black, navy blue or very dark grey dresses, with white collars. Plain white blouses will be permitted in summer.

Belgium still has a wooden shoe industry, much of the production being shipped to France, Germany and the Netherlands.

## for RHEUMATISM

Don't Minard's have a warm cloth. But Minard's are in a class by themselves. . . . and soon you'll get relief!

### MINARD'S "KING OF PAIN" LINIMENT

### Cabbage and Goitre

Medical Men See Some Connection Between "Vegetable and Disease"

Cabbage that grows in the vegetable kingdom that brings vitamins cheaply to our tables, is under medical suspicion as a cause of goitre.

In his address to the Manitoba Medical Association in convention at Winnipeg, Dr. A. C. Abbott, Winnipeg, cited experiments carried out at Johns Hopkins University which showed winter cabbage caused goitre in rabbits in the short space of three weeks. He told of a survey he has recently completed among Winnipeg school children in which his findings bore out this theory.

Dr. Abbott found it significant that children of British extraction whose diet was varied, showed less than 12 per cent. affected thyroid glands while between 30 and 40 per cent. of children whose people came from Europe had enlarged thyroids. He found central Europeans ate a tremendous amount of cabbage, in comparison with British people.

## THE RHYMING OPTIMIST

By Alice Michaels

### WITH THE TWILIGHT

Will you forget, at nightfall,  
The lances of mellow light  
That rest upon the river,  
The tireless gulls in flight?  
The river, slowly nearing  
Its long-desired sea;  
Will you forget, at twilight,  
The prairie wind, and me?

You may forget, at nightfall,  
Those scenes where once we moved,  
And all the fading pageant  
Of beauty that we loved;  
But ever with the twilight  
And those lost joys we knew  
I shall come creeping back, dear,  
I shall be near to you!

### Sixty Is Fairly Fast

A man who says he usually travels in the open country at 55 to 60 miles an hour writes to The Star that "speed maniacs" pass him going 70 to 75 miles an hour. No doubt these complain that they are sometimes passed by reckless persons driving 80 to 85 miles per hour. But isn't 60 miles an hour fairly fast in the first place?

Canadian Bacon Exports  
Canada's exports of bacon to Great Britain increased from 184,576 pounds in July, 1931, to 3,480,000 pounds in July, 1932, putting her in fourth place among nations selling bacon to the United Kingdom.

Cyrus the Great was the founder of the Persian Empire and conqueror of Babylon.

### Little Helps For This Week

A soft-answer turneth away wrath. Patience is not weakness. He who bears injuries without resentment triumphs in the end. Blessed are the meek for they shall inherit the earth.

"There's a time for work and a time for play. A time for everything good each day. But never a time in this short life for quarrels and angry words and strife."

I'll do anything for peace except fight for it.—Livingston.

### An Annual Custom

Children At St. Ives, England, Throw Bibles For Bibles

Dice were thrown for Bibles at St. Ives, England, recently. The custom is observed annually, and three Anglican and three Nonconformist children each received a Testament. The custom follows the provisions of the will, dated 1688, of Dr. Robert Wilde, and the cost of the Bibles is defrayed by rents from land known as Bible Orchard.

### Tons Of Cheese Exported

Five tons of Canadian cheese were exported to England from Quebec on the liner "Aurania," one of the largest shipments made from there in many years. It is expected that other large amounts of cheese will be shipped during the remainder of the navigation season.

### Canadian Tobacco For Africa

Twenty-five casks of Canadian tobacco have been shipped to Sierra Leone, the first time from this country to find a market in West Africa. Hitherto the United States has supplied most of the demand there.

### Trying to Strengthen

#### High School Studies

The Innisfail School Board has made a strong appeal to the parents of pupils to rigidly restrict the number of social functions in which the pupils engage. "As parents you, of course, have the true interests of your children at heart, even more than the teachers can possibly have, but we feel that many of you have not realized the extent to which plays, dances, etc. interfere with the progress of your children. Not only do these things turn the minds of the students from their work, but often boys and girls frequently come to school too much exhausted to work efficiently."

### For Sale

Pipeless Furnace: 2 Combination Screen Doors; 4 Screen Windows; Kitchen Set in blue enamel, consisting of Dutch Cupboard, large Dropleaf Table and 4 Chairs; also Enamel topped Kitchen Table, about 20 yards of Wilton Carpet, suitable for stairs or runners. All in excellent shape.

T. GOLDIE, Crossfield

### LOCAL NEWS

Gordon Young spent Tuesday with friends at Bowden.

Carstairs now has a talking picture show on Monday night of each week.

Mr. and Mrs. Clarence Havens and daughters were Calgary visitors on Saturday.

Everett Bills loaded a car of Garnet wheat over the platform on Saturday.

Miss Eva Jarman left on Monday for Calgary, where she will attend Mount Royal College.

Mrs. Miffie Fike and infant daughter returned home from Calgary on Saturday.

Wm. Pines is visiting at the Dorsch home, Carstairs, during his stay in the district.

BORN—To Mr. and Mrs. J. W. McCardle, at Didsbury, on Sept. 13, a son.

William Stafford got in three days threshing before the storm, and his wheat was averaging 30 bushels.

Remember you receive 10 per cent on all Village taxes paid on or before Dec. 1st.

Mrs. J. C. Burchart was the guest of Mrs. W. K. Gibson between trains on Friday.

W. K. Gibson is going to Calgary once or twice a week for chiropractic adjustments for sciatic rheumatism.

Adam Cruickshank, Donnie McFadyen and Dan Hays were out shooting ducks on Thursday last and got 20.

Rain on Sunday prevented the playing of the tennis tournament between Cochrane and Crossfield Tennis Clubs on the local courts.

Mr. and Mrs. F. Ruddy were visitors in Calgary on Friday. Mr. J. Ruddy returned with them and will spend some time in the district.

R. M. McCool, J. P. Wunning, C. H. McMillan, and Bob Thomas attended the Edmonton-Lethbridge football game in Calgary on Saturday afternoon.

Rev. H. Young and J. P. Metheral attended the meeting of Red Deer Presbytery at Bowden on Tuesday.

The Village tax notices were sent out last week, and already a number have paid their taxes, taking advantage of the 10 per cent discount.

W. K. Gibson is giving up the John Deere implement agency, and after the first of the month will devote his time to the buying of hogs and cattle and gristing. He is at present fixing up an office near the stock yards.

The anniversary services in connection with the United Church have been fixed for Nov. 6th. Rev. Dr. G. W. Kerby of Calgary has been secured as preacher for the occasion.

Ott Bros. who were threshing last week on the Trea farm, near the East Community Hall, trucked into the elevator at Crossfield, a load of wheat every 40 minutes with one truck. Which you will admit is going some.

Mr. and Mrs. W. McCrory left on Saturday for Macleod, where they will spend the winter months. Mr. McCrory's general health has greatly improved during the past two months, but he is still unable to get around.

Mayor Williams was recalling the other night the death of an old-timer back in Ontario, who was a very heavy drinker and liquor finally killed him—but he was 116 years old when he passed out.

Major J. R. Lowery and his daughter, Miss Jean Lowery, of Vancouver, spent sometime in town on Wednesday renewing acquaintance with Dr. Williams. Major Lowery founded the Home Oil Co. and is head of the Lowery Petroleum Oil Co.
